The UNSCO Socio-Economic Report is also accessible on www.unsco.org.

Since 1996 UNSCO has continually monitored and reported on socio-economic conditions in the occupied Palestinian territory (oPt) and, in the process, established an extensive socio-economic database. UNSCO does not produce primary data but rather makes use of available data, that in the oPt are relatively abundant. The information that is available, however, often remains dispersed and is not automatically shared between institutions. The objective of the database is to collate a wide range of social and economic indicators in one location, and, through the report, present a broad perspective of socio-economic conditions in the oPt.

The purpose of the present report is to: 1) broaden the access to the information contained in the database through publication of the most recent data gathered; and 2) provide readers with up-to-date information on short term changes in socio-economic conditions in the occupied Palestinian territory.

The report is divided into seven sections, as follows:

Section I. consists of a one-page fact sheet that provides a snapshot view of the socio-economic situation for the current and previous reporting periods.

Sections II. and III. report on the macro-economic and fiscal situation, and sections IV. and V. give an overview of developments in the banking and private sectors, respectively. Section VI. deals with trade, and Section VII. is dedicated to issues on Gaza.

Two annexes provide detailed reference information. Annex A presents detailed statistical reference tables, and Annex B lists the main socio-economic terms used in this report along with their corresponding definitions.

Topics of current interest are analyzed in-depth in periodic "Supplements".

Most sections provide data on the six preceding reporting periods for each indicator and a reference period.

Note: The data for the West Bank and the oPt in this report do not include occupied East Jerusalem unless otherwise specified.

.

I. SOCIO-ECONOMIC FACT SHEET - OCTOBER 2012

Key macroeconomic indicato	rs				
Production		Q2/2000	Q1/2012	Q2/2012	Change in Q2/2012 (%)
GDP (constant 2004 prices, US\$ m	nillion)	a/	1,580 ^{b/}	1,722 ^{b/}	9.0 ^{b/}
GDP rate of change (year-on-year	c, constant 2004 prices, %)	a/	5.6 ^{b/}	7.7 ^{b/}	
GDP per capita (annualized, const	ant 2004 prices, US\$)	a/	1,579 ^{b/}	1,708 ^{b/}	8.2 ^{b/}
Prices		Aug 2000	Sep 2012	Oct 2012	Year-on-year (Oct 2012)

II. MACRO-ECONOMIC SITUATION

II.a Production

Real GDP increased by 9% in Q2/2012 compared to Q1/2012, and was almost 8% higher than in the same quarter a year earlier. Compared to Q1, in Q2/2012 real GDP increased by 8% in the West Bank (6% year-on-year) and by 12% in the Gaza Strip (12% year-on-year as well). Real GDP reached US\$1,722 million in the second quarter of 2012 (US\$2,568 million in nominal terms), of which 70%, or US\$1,203 million, was generated in the West Bank and 30%, or US\$519 million, in the Gaza Strip.

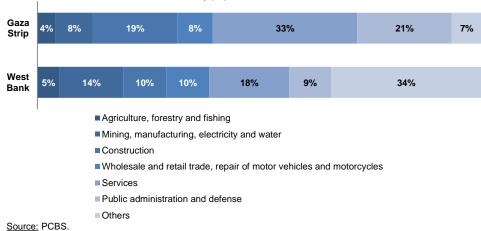

Real GDP (US\$ million)

Source: PCBS. Note: Base year is 2004.

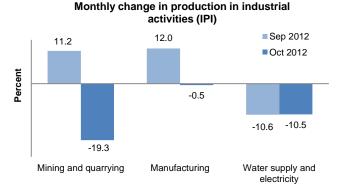

The percent distribution of GDP by economic activity reveals a greater diversification of the economy in the West Bank than in the Gaza Strip. More than half of GDP in the Gaza Strip in Q2/2012 was generated in the services

(33%)and public administration and defense (21%)sectors. while construction contributed 19% of GDP. All other sectors represented less than 10% each of total value added. In the West Bank, on the other hand, services is also the largest sector but represented only 18% of total GDP in Q2/2012, followed by mining, manufacturing, electricity and water with 14%.

The Industrial Production Index (IPI), used to gauge short term changes in productive activity, decreased by 3.4% in October 2012 compared to September of the same year. During the month, productive activity decreased by 19.3% in the mining and quarrying sector (with a share of 4.6% in the IPI), by 10.5% in the water supply and electricity sector (with a share of 14.9% in the IPI), and by 0.5% in the manufacturing sector (which has a share of 80.6% in the IPI).

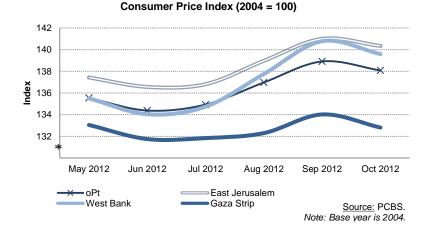

Source: PCBS.

II.b Prices

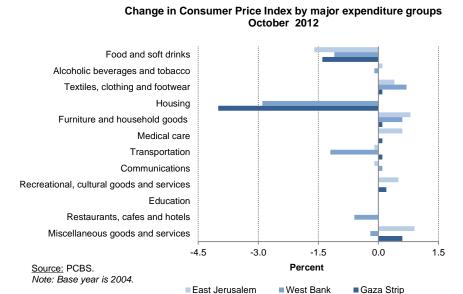

The Consumer Price Index (CPI), used to measure inflation, decreased by 0.6% in October 2012 compared to September of the same year, but it was 3.2% higher than in October 2011.

The CPI decreased by 0.8% in the West Bank in October 2012 compared to September, but it was 5.5% higher than in October 2011. The prices for housing, transportation, and food and soft drinks all decreased more than 1% during the

month. Textiles, clothing and footwear, and furniture and household goods showed the greatest price increases during the month.

In East Jerusalem the CPI decreased by 0.5% in October 2012 but it was 3.8% higher than in October 2011. The

price for food and soft drinks decreased the most during the month. The greatest price increases were recorded in miscellaneous goods and services, and furniture, household goods.

The CPI decreased by 0.9% in the Gaza Strip in October 2012, but it was 0.3% higher than in October 2011. The prices for housing and food and soft drinks saw the biggest decreased during the month, whereas the greatest price increases were in miscellaneous goods and services.

II.c Exchange rates

The New Israeli Shekel (NIS) rose against both the US dollar and the Euro in October 2012. The Jordanian Dinar (JOD) fell against the Euro while its exchange rate to the US dollar remained fixed at 0.71.

Average monthly exchange rates

	Aug 2000	May 2012	Jun 2012	Jul 2012	Aug 2012	Sep 2012	Oct 2012
NIS/US\$	4.05	3.83	3.89	3.99	4.02	3.95	3.85

II.d Labor market

In Q3/2012, 43% of persons aged 15 years and above, or more than 1.1 million persons, participated in the labor force, including about 740 thousand people in the West Bank and 375 thousand in the Gaza Strip. The labor force participation rate in Q3/2012 was basically unchanged compared to Q2/2012 both in the West Bank, where it was at 45%, and in the Gaza Strip, where it was at 40%.

Labor force participation rate (%) (Labor force in thousands)

	Q2/2000	Q2/2011	Q3/2011	Q4/2011	Q1/2012	Q2/2012	Q3/2012
West Bank	45.3	45.3	46.2	47.3	45.4	45.4	45.2
	(483.8)	(711.1)	(732.1)	(754.9)	(731.2)	(738.2)	(740.2)
Gaza Strip	40.1	38.1	39.0	39.5	39.9	40.3	40.4
	(222.4)	(336.8)	(348.7)	(356.3)	(363.3)	(371.1)	(375.4)
oPt	43.5	42.7	43.6	44.4	43.4	43.6	43.4
	(706.2)	(1047.9)	(1080.8)	(1111.2)	(1094.5)	(1109.3)	(1115.6)

Source: PCBS.

The number of people employed relative to the working age population and the labor force participation rate both continue to be higher in the West Bank than in the Gaza Strip, and both are considerably higher for men than for women. Both male and female labor force participation hardly changed in Q3/2012 compared to the previous quarter, remaining at 69% and 17%, respectively.

Labor force participation rate and employmentto-working age population ratio Q3/2012 60 Employment-to-working age population ratio (percent) Male 50 West Bank 40 30 Gaza Strip 20 **Female** 10 0 O 20 40 80 Labor force participation rate (percent)

Total unemployment rate and unemployment rate 20-24 yrs Q3/2012 40 unemployment rate (percent) **Female** Gaza Strip 30 oPt Male 20 West Bank 10 Total 0 0 40 80 Unemployment rate 20-24 yrs (percent)

The labor force increased by approximately 6,300 people in Q3/2012, but the number of people employed actually decreased by about 32,400 persons, resulting in an increase of more than three percentage points, to 24%, in the unemployment rate. The unemployment rate in the West Bank was 20% in Q3/2012, following an increase of three percentage points, and in the Gaza Strip it was 32% due to an increase of close to four percentage points. Unemployment for men increased by almost two percentage points to 21%, but the unemployment rate for women increased by more than nine percentage points to 39%, widening the existing gap between the sexes. For people between 20 and 24 years of age, the unemployment rate increased by eight percentage points to 44%. In the West Bank, the unemployment rate for this age group increased from 28% to 35%, and in the Gaza Strip from 50% to 59%.

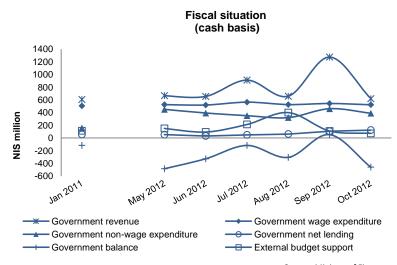

Average daily wages (excluding for those working in Israel and Israeli settlements) increased by almost NIS1 to NIS81 in Q3/2012. Average wages in the West Bank were almost unchanged during the quarter at close to NIS88, and those in the Gaza Strip increased by almost NIS2 to NIS66. Average wages in the private sector increased by NIS3 to NIS73, while they remained almost unchanged in the public sector at NIS91.

III. PUBLIC SECTOR

Government net revenue (cash basis) was 51% lower in October 2012 compared to September, and was 8% lower than in October 2011, reaching NIS620.5 million. Non-tax revenue, which represents only 8% of total net revenue, decreased by 40% during the month, and was 6% lower than in October 2011. Tax revenue, which represents 20% of total net revenue, decreased by 33% from September to October 2012, and was 32% compared to October 2011. Clearance revenue accounts for 73% of total net revenue and decreased by 57% from September to October 2012, reaching a level 2% higher than in October 2011.

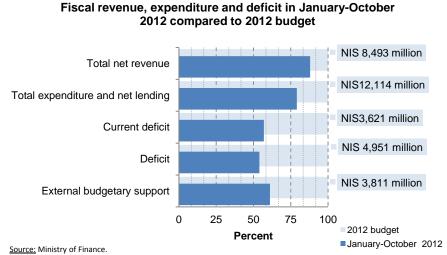

Source: Ministry of Finance.

Note: This graph updates information from previous months with information available as of 15

November 2012.

Total expenditure plus net lending reached NIS1,038.9 million in October 2012. Government wage expenditure decreased by 4% from September to October 2012, but was 5% higher than in October 2011. Non-wage expenditure decreased by 15% in October 2012 compared to September, and was 10% lower than in October 2011. The government's net lending increased by 18% from September to October 2012, reaching a level 152% higher than in October 2011. The resulting current deficit amounted to NIS418.4 million, and the overall deficit (after development expenditure) reached NIS459.3 million at the end of October 2012. External budgetary support reached NIS72.8 million in October 2012.

The PA's 2012 approved budget amounts to NIS13,444 million, based on a projected total net revenue of

Note: This graph updates information from previous months with information available as of 15 November 2012.

NIS8,493 million. and expenditure plus net lending of NIS12,114 million. Ten months into the year, the PA's total revenue equaled 88% of the annual budgeted amount, and total expenditure plus net lending equaled 79%. The current deficit reached 57% of the annual budgeted amount, and the overall deficit was 54% of the annual budgeted amount. External budgetary support at the end of October 2012 was only 61% of the amount in the annual budget.

IV. BANKING SECTOR

In Q3/2012, the volume of credit decreased by less than 1% to US\$3,829 million compared to Q2/2012. Most of bank credit is in the form of loans, and their size relative to total bank credit increased by four percentage points to 74% in Q3/2012. At the same time, the proportion of overdrafts in total credit decreased by four percentage points to 26%. The proportion of leasing in total bank credit increased slightly (see further details in Table A4 in Annex A).

Distribution of bank credit by type (%) (Bank credit by type in million US\$)

Note: The totals may not be exactly equal to the sum of percentages due to rounding.

Q3/2012 saw an increase of 4% in total bank deposits. Public sector deposits, which account for 8% of total deposits, increased by 10% during the quarter, while private sector deposits increased by 4%. Deposits from residents, which account for 97% of total private sector deposits, increased by 4%, while those of non-residents increased by close to 5%.

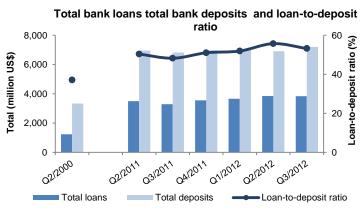

Distribution of bank deposits (in million US\$)

	Q2/2000	Q2/2011	Q3/2011	Q4/2011	Q1/2012	Q2/2012	Q3/2012

Source: Palestine Securities Exchange

In October 2012, the number of shares traded increased by 34% and the value of shares traded increased by 12% compared to September. Of the 43 companies traded in the month, 18 were gainers, 22 were decliners and 3 companies were stable. The Al-Quds index increased by 2.9% in October 2012.

The use of information and communications technology (ICT) can boost the performance of the business sector, in particular through reduced processing times and transaction costs, enhanced efficiency, improved access to services and information, and opportunities for business promotion and innovation. In the oPt, the use of ICT in the business sector is in general more common in the West Bank than in the Gaza Strip, although there still is much room for harnessing the benefits of ICT in both areas.

Source: PCBS

a/ Data not available.

In terms of services offered to the industrial sector, most owners/managers of active industrial enterprises in the West Bank report being satisfied with the electricity supply, the water supply, the quality of roads, the ease of obtaining necessary permits and licenses and the tax administration. In the Gaza Strip, on the other hand, the level of satisfaction with the electricity supply, the water supply and the quality of roads is very low, but it is similar to the West Bank when it comes to obtaining necessary permits and licenses and the tax administration.

Proportion of owners/managers of the active industrial enterprises who are satisfied with governmental and private services (%) Q2/2012

	77-7								
	West Bank Gaza Strip								
	Satisfied	Not satisfied	Satisfied	Not satisfied					
Electricity supply	82	18	0	100					
Water supply	71	29	23	75					
Quality of roads	75	24	23	71					
Obtain necessary permits and licenses	62	28	67	6					
Tax administration	70	27	69	25					

Source: PCBS.

Note: The percentages may not add to 100 because of "Don't Know" answers.

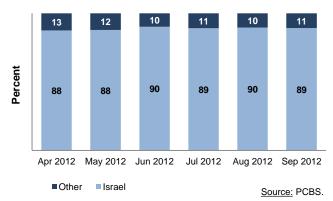

VI. TRADE

Registered exports of goods increased by 3% in September 2012 compared to August, and were 2% higher than a year earlier, amounting to approximately US\$59.1 million. Palestinian exports of goods to Israel increased by 3% during the month, while exports to other countries increased by 8%. Israel continued to be the main market for Palestinian goods, absorbing 89% of registered goods exports from the oPt in September 2012.

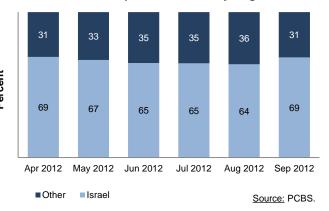

Registered imports of goods decreased by 8% in September 2012 compared to August, and were 6% lower than a year earlier, amounting to approximately US\$328.3 million. Imports from Israel decreased by 1% during the month, and imports from other countries decreased by 21% compared to August 2012. Imports from Israel represented 69% of total Palestinian imports during the month.

A goods trade deficit of US\$269.2 million was recorded in September 2012, reflecting a 10% decrease from August (and a level 8% lower than the same month a year earlier).

Goods exports from oPt by destination

Goods imports to the oPt by origin

VII. GAZA STRIP

There was a 17% increase in the amount of cooking gas imported into the Gaza Strip in October 2012 compared to the previous month, with 2,798 tons allowed in through the Kerem Shalom (Karem Abu Salem) crossing. In October 2012, 69,500 liters of petrol and 440,507 liters of diesel were imported for UNRWA, while 70,000 liters of diesel were imported for the private sector.

Volume of registered fuel sales in the Gaza Strip

	Aug 2000	May 2012	Jun 2012	Jul 2012	Aug 2012	Sep 2012	Oct 2012
	Nahal Oz			Kerem	Shalom		
Petrol (1000 liter)	3,188.9	254.2	32.0	33.7	69.6	34.2	69.5
Diesel (1000 liter)	11,343.0	936.9	542.7	222.6	274.0	151.1	510.5

Source: General Petroleum Corporation, Ministry of National Economy.

In October 2012, the number of truckloads (including fuel) imported into the Gaza Strip increased by 16% compared to September 2012. (See further details in Table A9 in Annex A.)

The proportion of truckloads with food items among imports decreased by four percentage points and made up 30% of imported goods (1,601 truckloads) in October 2012, while the remaining 70% of imports (3,735 truckloads) were non-food items.

A total of 1,586 truckloads entering the Gaza Strip brought materials for approved international building projects, including (100,870 truckloads tons) gravel, 123 truckloads (4,885 tons) of cement and 22 truckloads (717 tons) of steel bars for building projects UNRWA, UNDP USAID, Coastal ANERA, Municipalities Water Utility, ICRC and the Palestinian Water Authority.

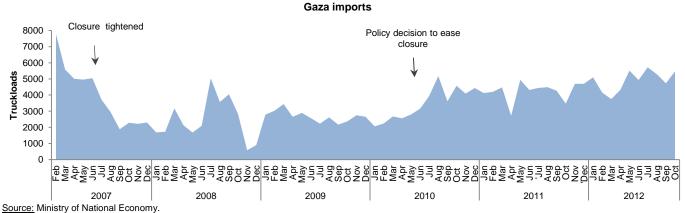

Source: Ministry of National Economy.

Note: Truckload imports exclude industrial diesel supplies to power plant.

Note: Karni crossing has remained closed since 12 June 2007 for the movement of goods in and out of Gaza,
and on 1 March 2011, Israel closed the conveyor belt at Karni, too

Following the June 2010 decision to ease the closure of the Gaza Strip, monthly import levels have averaged around 4,442 truckloads.

Note: The figures exclude gravel imported through Karni in February-May 2007, as well as imports through Rafah and Erez.

On 8 December 2010 Israel announced its intention to gradually expand the number and range of exports permitted from the Gaza Strip. According to this announcement, allowed exports would include agricultural produce, furniture and textiles.

Gaza Strip exports

	Total number of trucks	Goods	Destinations
January 2012	69	Straw berries (53 trucks/172.1 tons)	Europe
		Carnations (9 trucks/1,205,550 stems)	
		Cherry tomatoes (4 trucks/29.30 tons)

Sep 2012	0	,	
Oct 2012	2	Basil (2 trucks/1.1 tons)	Europe

Source: Palestinian Agricultural Relief Committees, Ministry of National Economy.

Note: According to the Palestinian Wood Industries Union, furniture was shipped from Gaza in June 2012 to an exhibition in Jordan under the condition that the furniture be sold in Jordan afterwards and not be sent back to Gaza, therefore bring considered here as an export. Six companies from Gaza participated at the event, exhibiting bedroom, dining room, living room and children's bedroom furniture.

In October 2012, two truckloads of basil (1.1 tons) were exported to Europe through the Kerem Shalom commercial crossing. Furthermore, in October 2012 the World Food Program coordinated the transfer of 9 truckloads (99 tons) of date bars to the West Bank from the Gaza Strip through the Kerem Shalom commercial crossing.

^{a/} Data not available.

ANNEX B: Terms and definitions

Adjusted unemployment rate

The adjusted unemployment rate presents the number of unemployed according to the relaxed definition as a percentage of the labor force. The relaxed definition of unemployment includes all persons aged 15 or over who are unemployed plus those who, during the reference period, are without work, are available for work but did not seek work (and therefore could not be classified as unemployed) because they felt that no work would be available to them.

The adjusted unemployment rate gives a broader measure of the unutilized supply of labor. The relaxation of the standard definition of unemployment makes sense in circumstances where the conventional means of seeking work are of limited relevance, where the labor market is largely unorganized, where labor absorption is inadequate or where the labor force is largely self-employed.

Al-Quds index

This is the primary stock index of the Palestine Securities Exchange (PSE).

Area licensed for new construction

This is the area licensed for construction in new and existing buildings.

Average daily net wage

This average is calculated as the total net wages paid to all employees divided by total workdays. Wages received in different currencies are converted into New Israeli Shekels according to the exchange rate in the survey month.

Bank credit

It measures the borrowing capacity provided to individuals, firms and organizations by the banking system in the form of loans or other types of credit. Credit is generally believed to contribute to economic growth.

Bank deposits

Deposits are accounts maintained by a bank on behalf of customers. This indicator is often used to measure the safety of and people's trust in the banking system.

Consumer Price Index (CPI)

The CPI is a statistical tool used to measure changes over time in the prices paid by households for a basket of goods and services that they customarily purchase for consumption. The CPI is used to measure inflation over time.

The main categories of goods and services included in the basket of goods are: fruits, vegetables and other food items, beverages, tobacco, textiles, clothing, footwear, furniture, household appliances, household utensils, fuel, power, transportation, communications, medical and pharmaceutical products, goods for personal care, services charges for public transport, communication, hospital care, and others, and school fees. Data on prices for consumers are collected through visits conducted by trained staff to selected markets including groceries, supermarkets, markets, restaurants, general services offices, hospitals, private schools, etc.

Effective/partial closure days

Effective closure days are calculated by adding all days when a crossing is fully or partially closed, excluding weekends and holidays. Partial closure means that the crossing is closed for more than one hour but not for a full day, in which case it would be considered fully closed.

Weekends and holidays include all Saturdays, half the Fridays (since labor and commercial flows are about half their normal workday level on Fridays) and universally celebrated Jewish and Muslim holidays. Jewish and Muslim holidays which fall on Saturday or Friday are not counted as a holiday but as a Saturday (full day closure) or Friday (half day closure), respectively.

Employed

The "employed" comprise all persons are 15 years or over who were working at a paid job or business for at least one hour during the week prior to the survey, or who did not work but held a job or owned business from which they were temporarily absent (because of illness, vacation, temporarily stoppage, or any other reason) during the reference week.

Exchange rate

The price of one currency stated in terms of another currency is the exchange rate.

Exports

Exports are any good or commodity, shipped or otherwise transported out of the territory to another part of the world, typically for use in trade or sale. Export products or services are provided to foreign consumers by domestic producers.

Gross Domestic Product (GDP)

GDP is the total value of all goods and services produced within oPt in a given period of time.

When GDP is expressed in constant terms (real GDP), a deflator is used to adjust for changes in money-value.

Quarterly data are annualized by multiplying by 4.

GDP per capita

This is the result of the division of GDP by total population.

$$GDP \ per \ capita = \frac{GDP}{population}$$

GDP rate of change

The rate of change is the percentage change (increase or decrease) of GDP from the previous measurement cycle.

GDP rate of change in period (t) =
$$\frac{\text{GDP in period (t)} - \text{GDP in period (t - 1)}}{\text{GDP in period (t - 1)}} \cdot 100\%$$

Inflation rate

The inflation rate is the percentage change in the price index over time.

$$Inflation \ rate \ in \ period \ (t) = \frac{Price \ index \ in \ period \ (t) - Price \ index \ in \ period \ (t-1)}{Price \ index \ in \ period \ (t-1)} \cdot 100\%$$

Government total net revenue

It measures the net inflows received by the government, including clearance revenue, tax refunds, and tax and non-tax revenue collected by the Ministry of Finance and other ministries for the consolidated Single Treasury Account (STA).

Government wage expenditure

This is the government's outlay on the wages and salaries of permanent civilian and security employees.

Government non-wage expenditure

This is the part of government expenditure absorbed by operational expenditures, transfers and minor development and capital expenditures.

Government net lending

This term includes transfers to local government to cover clearance revenue, deductions by the Government of Israel for water and electricity, and services by the Ministry of Health and the Ministry of Agriculture.

Government balance

The government balance is the difference between the government's total net revenue and its expenditures, including wage and non-wage expenditures, net lending and development expenditures.

External budget support

It consists of transfers of resources by donor countries to the Palestinian National Authority to help finance its budget.

Imports

Imports are the goods and services that are produced by the foreign sector and are purchased by the domestic economy.

Industrial Production Index (IPI)

This index is a statistical tool used for measuring changes in the volume of industrial production during a certain period of time. The index uses the change in volume of production for the largest establishment in each industry. The relative share for the main industrial activities represents the percent share of value added of the industrial institutions in 2009 in addition to the value added of olive presses.

Labor force

The labor force consists of all persons of working age (15 years or over) who are either employed or unemployed during a specified reference period.

Excluded from the labor force are those of working age who are neither working nor searching for work. These could be students, retired persons, those in prison, and homemakers.

Loan-to-deposit ratio

This ratio gives the amount of banks' loans divided by the amount of their deposits. The statistic is often used to assess the banking system's liquidity. If the ratio is too high it may imply that banks could not have enough liquidity to cover any unforeseen fund requirements. Conversely, if the ratio is too low banks may not be lending and earning as much as they could be.

$$loan - to - deposit ratio = \frac{bank \ loans}{bank \ deposits} \cdot 100\%$$

Number of new company registrations

This is the number of new companies that register with the Ministry of National Economy to conduct business operations in oPt.

Number of shares traded

It is the amount of shares that trade hands from sellers to buyers in the market over a given period.

Underemployment

Underemployment exists when a person's employment is inadequate in relation to specified norms or alternative employment. Time-related underemployment applies to those who involuntarily work less than the normal duration of work determined for the activity and who seek or are available for additional work during the reference week.

Unemployment rate

The "unemployed" comprise all persons aged 15 or over who, during the week before the survey, were without work, available for work and seeking work. The unemployment rate expresses the number of unemployed as a percentage of the total labor force.

The indicator is widely used as a measure of unutilized labor supply.

$$unemployment\ rate = \frac{unemployed}{labor\ force} \cdot 100\%$$

Value of shares traded

The value of shares traded is the sum of the shares traded multiplied by their respective matching price.
